

180 Day Health Guarantee

Puppy Friends

Welcome to the Puppy Friends family! Thank you for giving one of our puppies a new home. The sellers certify that the puppy you purchased is in sound health at the time of sale to the best of our knowledge and has been given all the vaccinations and de-worming stated on the vaccination record provided to the new buyers. We do our best to provide the new owner with a healthy puppy. The buyer will be responsible for further vaccinations and boosters.

The Following Stipulations must be adhered to in order for a replacement to be made. Official reports from 2 unaffiliated vets stating that, without a doubt, the puppy has a illness that will cause a shortened life to the puppy, and must be sent to us along with the phone number of each vet. If the puppy should die, an autopsy MUST BE DONE by a licensed vet stating the cause of death. The documentation must be forwarded to us before a determination will be made.

The sellers reserve the right to confirm the diagnosis with a vet of their choice. The seller will not be responsible for any expenses you may incur, including shipping and vet expenses; Puppy replacement or some reimbursement will be made after we have the puppy looked at by a vet ourselves.

We cannot control the exposure your pup encounters after leaving here. Puppies sometimes stress when adopted and move to a new home. This stress can be brought on due to the move, change of diet, too much handling, not enough quiet time, or not eating and drinking properly. This stress can also bring things that are dormant such as, but not limited to worms, ear mites, colds, hypoglycemia, and/or coccidiosis, and/or giardiasis. These conditions are all treatable and do not warrant a replacement.

There is no guarantee on color or size of the puppy now or as an adult.

The following are NOT covered by this guarantee:

- Reimbursement for vet expense
- Reimbursement for air transport or return
- External parasites, such as ticks, fleas, ear mites, or lice
- Internal parasites, such as, intestinal worms, or their effects (almost every puppy has some sort of intestinal worms; although we have wormed your puppy regularly, it takes just a few days for him/her to pick-up another "batch". That is just another part of puppyhood, which is why a regular worming schedule is recommended.)

We strongly recommend, but do not require that your puppy to be spayed/neutered. It is your ultimate responsibility to take good care of your puppy and provide adequate food, water, shelter, and vet care. We have bred this puppy based on sound parents. Thru proper diet, proper exercise, and quality living conditions, you can play an important role in helping your puppy grow into a healthy adult. If for any reason you are unable to take care of your Puppy Friends puppy, please contact us. We will gladly take

your puppy/dog back; though no money will be refunded. We love our dachshunds and under no circumstances do we want them to end up homeless or in an animal shelter.

I have read & agree to the conditions of this contract
